

Protect Antibiotics from Factory Farm Abuse

Dear Elected Official,

As your constituent, I urge you to take action to limit the overuse of antibiotics on factory farms. Right now, large-scale industrial farms routinely give their livestock low doses of antibiotics, even when the animals aren't sick. This practice is directly leading to the creation of antibiotic-resistant bacteria that are a serious public health threat. The Centers for Disease Control and Prevention report that each year, 2 million people become infected with antibiotic-resistant infections, and at least 23,000 die from them. Please protect our community's health by supporting local efforts to limit the overuse of antibiotics on factory farms.

Sincerely,
